CLIENT ScanDEX

Add on to ScanDEX/Pro. Computer Assisted Indexing, Archiving and Distribution.

SCANDEX/CLIENT

ScanDEX/Client is a network-enabled front-end system to the ScanDEX archives. Multiple users can search for, view, edit, and print records from the same archive at the same time. The user-interface consists of three interactive views: the Form & Search View, the Image View, and a Record List View. With moveable split bars and toolbar buttons, ScanDEX/Client is very easy to use and customize.

FEATURES AND BENEFITS

- Easy To Use Interface
- Index, and Archive Anywhere
- Customizable Database Front End
- Advanced Multi-Page TIFF Management
- Supports TWAIN & ISIS Scanners
- Direct Printing to any Windows Compatible Printer
- Xerox 8825/8830, Océ 9400, and KIP Starprint 3000

CUSTOMIZING

You can customize the Form & Search View to your specific needs, and integrate data from any of your existing database tables. Include your company logo, or any other information to make the program your own.

SEARCHING

Find single or groups of drawings by using wildcards, custom controls, or pre-defined query buttons. View groups of related documents in customizable lists. Simple searches make your drawings easy to find.

VIEWING

Images are shown in the Image View. You can zoom and perform multiple image functions. ScanDEX/Client supports most raster formats directly, and with the ScanDEX/PLUS add-in viewing module, you can view over 150 standard document formats, including AutoCAD and Word files.

PRINTING

You can print your images directly to multiple Xerox 8830, 8825, Océ 9400, and KIP StarPrint 3000's (Solus4) or any Windows compatible output device. You can choose specific index fields to print with the image, or you can print the image and the field values separately. Print sets of images as collated sets. You can also run external applications and e-mail you images directly from the archive. ScanDEX/Client includes version and print tracking tools.

DISTRIBUTE ON CD-ROM

The ScanDEX/CD application is an add-on to ScanDEX/Client. With ScanDEX/CD you can export the archive, or any part of it to a CD-ROM with a built-in viewer and search engine. You can design your own forms and graphics to meet your customers' specific requirements.

WHEN SOLUTIONS MATTER

A Webinar is a great way to see a product in action from the convenience of your PC. Arrange a one-on-one Webinar today by e-mailing sales@ideal.com or calling IDEAL at 1-888-524-3325.
